

MAKE IT POLETECH AT ROOTSTECH 2027

Have you ever thought about going to RootsTech?

Did you feel uncomfortable going alone?

RootsTech is the premier genealogical event, and the Polish Genealogical Society of America (PGSA) and Polish Language for Adults (PLfA) are organizing a “Polish Genealogy Get Together” at RootsTech in March, 2027. Between 1988 and 2014, PGSA was a lead organizer of 14 group visits to the Family History Library in Salt Lake City. With the advent of RootsTech, our two organizations are hoping to re-establish this group approach.

What does “Polish Genealogy Get Together” mean?

- PGSA and PLfA have been working with Family Search to organize personalized events for Polish genealogists such as:
 - Private meeting room for us to mingle and share ideas.
 - Tour of the Family Search Library, concentrating on the Polish Collections.
 - Presentation(s) by FamilySearch staff.
 - Research time with Family Search Assistants.

How will it work?

- PGSA and PLfA will arrange the meetings, etc. with Family Search.
- Each of you makes your own flight and hotel arrangements according to your desired length of stay, cost preference and other plans.
- If you are interested in sharing a room, we will help you find a roommate

Has RootsTech been on your to do list? Then 2027 is the year to do it with a group of fellow Polish researchers with whom to share, and from whom to learn.

For more information, contact either of us...
